

IN THE CLAIMS

The pending claims are believed to be as follows:

1. (Currently Amended) System for selecting and confirming an impulse purchase for pay television comprising the presentation to a user, by means of a display device, of a grid of programmes, and the selection by this user of a programme of his particular choice from the grid by means known per se, this choice having to be confirmed in the system by an entitlement management message (EMM), this message being specific to an impulse purchase, characterized in that the entitlement management message (EMM) specific to an impulse purchase is exclusively contained in the data (SD) tied to the presentation of the programme grid.
2. (Original) System according to Claim 1, characterized in that the entitlement management message is used locally in a hardware subassembly installed at the user's premises, this hardware subassembly comprising a security module in which is stored a subscriber authorizations and subscriptions profile relating to the user.
3. (Original) System according to Claim 1, characterized in that the entitlement management message specific to an impulse purchase may entail either the notification to authorize viewing, or that to veto this viewing authorization.
4. (Original) System according to Claim 1, characterized in that the entitlement management message (EMM) comprises conditions defining the authorization of viewing and conditions of cancellation of this authorization.
